

OFFICE OF THE CFO

Enabling Higher Performance With Amzur Services For NetSuite

Finance professionals are under constant pressure to deliver timely and accurate financial information coupled with strategic insights for supporting the growth and profitability of their organization.

As a company that prides itself on innovation and efficiency, at Amzur we understand the importance of a well-managed financial operation. And as a key NetSuite partner, Amzur provides a comprehensive suite of financial management solutions and services to help you streamline your operations, increase visibility into financial performance, and make better, data-driven decisions.

NetSuite Office Of The CFO

NetSuite provides extensive capabilities that enable CFOs to gain deep insights into their business operations and derive actionable information for decision-making. These include:

Financial reporting and analysis

NetSuite allows businesses to generate key financial reports like income statements, balance sheets, cash flow statements, and it also provides extensive customization to meet the business's specific needs. You can turn data into easy-to-read charts and pivot tables. With real-time data and intuitive dashboards, you can identify key trends, track KPIs, and generate detailed reports to support informed decision-making.

- *Role-based dashboards*
- *Drag-and-drop customization for personalization*
- *Prebuilt, industry leading KPIs, dashboards and analytics*

Financial planning and budgeting

Automate labor-intensive planning and budgeting processes within one collaborative, scalable solution. With less time spent on manual consolidation, troubleshooting, reporting and data loading, finance staff can reallocate time from data entry and formula maintenance to strategic analysis activities that have a greater impact on the company's financial position.

- *Advanced modeling capabilities*
- *What-if scenarios*
- *Real-time forecasts based on actual data*
- *Prebuilt workflows for tracking reviews and approvals*

Financial controls and compliance

Using NetSuite, you can automate process workflows to minimize or even eliminate labor-intensive and error-prone back-end reviews. NetSuite includes a range of features designed to ensure financial controls and compliance with regulatory requirements, these features include audit trails, segregation of duties, and other security measures to protect against fraud and error.

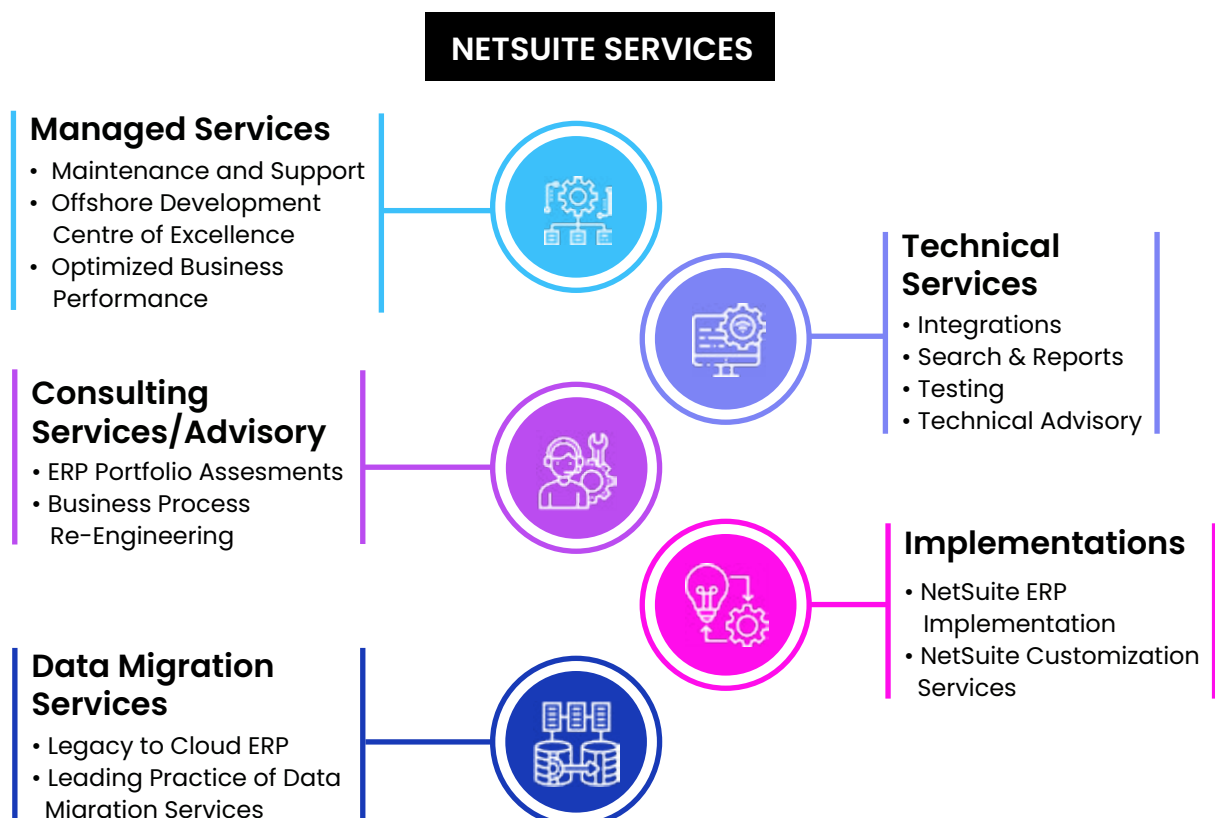

Enables global business growth, accounting, and financial operations

With NetSuite OneWorld, you can manage multiple subsidiaries, business units, and legal entities from within a single ERP. When the entire organization uses the same system, your business runs more smoothly and efficiently. With an inbuilt tax engine, you can manage global taxations through an easy-to-use system that automates the entire tax compliance process. You will be provided a comprehensive suite of accounting tools, accounts payable, accounts receivable, general ledger and other financial management functions.

- Preventative and detective controls
- Role-based security
- Always-on audit trails
- Support for SOC1, SOC2, ISO27001, ISO27018, PCI-DSS, PA-DSS, EU Cloud CoC and more

- Supports 27 languages and 190 currencies
- Support global as well as country-specific audit, tax and data security requirements
- Preconfigured tax codes and localized reporting for over 110 countries

The Amzur Advantage - A Complete Suite Of Services For Enabling NextGen Finance

With over 15 years of experience in successfully deploying NetSuite at over 600 customer locations, the Amzur team brings unmatched expertise in helping companies transform their operations. We recognize that finance challenges can vary from tactical to transformational, and we take pride in assisting our clients at every stage of their growth journey.

Our team can help you automate every aspect of your financial operations – from procure-to-pay, and all the way to order-to-cash, helping your organization achieve faster revenue realization, highly accurate transactions, and painless reconciliations. At Amzur we follow the **SuiteSuccess** methodology from NetSuite. This proven process provides significant benefits over traditional ERP deployment processes.

Amzur has helped a provider of HR, recruiting & contingency staffing services reduce its operational costs by 40% as well as achieve across-the-board improvements in business efficiency and visibility by deploying NetSuite.

Amzur has successfully deployed a real-time reconciliation solution for a customer in the retail industry, helping them reduce transaction and inventory reconciliation time from 8 hours to a mere 15 minutes daily.

Traditional approach

- Misalignment on requirements
- Delayed timelines & cost overruns
- Implementation fatigue
- Generic model – not specialized for finance operations

SuiteSuccess approach

- Aligns processes with industry leading practices
- Delivers 250+ reports and dashboards out-of-the-box
- Ensures deep user training for quick adoption of new platform
