

MODERNIZE OPERATIONS WITH ERP BUILT FOR GROWTH, AGILITY & CONTROL

Smarter ERP isn't just about setting it up, it's about being flexible, intelligent, and always optimizing. That's what Amzur delivers every time.

As your business grows, spreadsheets and separate systems just won't cut it. Most ERP solutions don't adjust well to real-world needs, which slows down adoption and return on investment. Amzur's ERP practice closes this gap with **customized and advanced NetSuite solutions** based on years of experience, industry-ready bundles, and smart automation. Whether it's handling multiple entities, fixing broken workflows, or tackling visibility issues, our built-in innovations help you solve problems faster.

Common ERP Challenges We Solve

- Fragmented systems that don't talk to each other and lots of manual work
- Complexities in managing operations across many locations or business units
- Lack of real-time insights for finance, inventory, and growth
- ERP tools that don't fit your unique processes
- Tools that don't connect well and users who resist adopting them

What We Deliver

Amzur provides full lifecycle ERP services that reduce time-to-value and enhance adoption from day one:

Service Area	What We Offer
ERP Advisory & Strategy	► We analyze your gaps, help pick the right ERP, create transformation plans, and quickly assess readiness
NetSuite Implementation	► Fast, low-risk setup tailored to your needs, powered by proprietary bundles and ready-made templates
NetSuite Customization	► Role-specific dashboards, workflow automation, and tailored UX to match your exact process needs
NetSuite Integration	► Robust connectivity across your CRM, eCommerce, supply chain, HR, and analytics platforms—powered by native and custom-built APIs
ERP AI Agent	► Our NetSuite-native AI boosts productivity with smart recommendations, alerts, and natural language queries
Automation & Controls	► Streamline operations with smart workflows, approval rules, and built-in business controls
Ongoing Optimization	► After launch, we keep tuning performance, updating roadmaps, and providing support so your ERP keeps growing with you

Beyond Implementation: NetSuite, Evolved

We do more than just implement NetSuite; we improve it. We find the gaps most ERP platforms miss and build NetSuite-native solutions to fill them.

Our growing set of **NetSuite extensions** includes:

- **Ready-to-use bundles** for finance, supply chain, and manufacturing
- **AI agents** that offer smart advice and automate routine tasks
- **Custom workflow apps** for your approval processes and controls
- **Integration tools** that link NetSuite with CRM, eCommerce, and analytics, even in mixed environments

With more than **200 ERP projects** completed, we bring a product mindset, deep tech skills, and a proactive approach to keep your ERP evolving as your business changes.

Results You Can Expect

- **Cut manual effort by up to 60% through automation and AI-driven workflows**
- **Reduce ERP implementation time by 30–50% using pre-built bundles and proven playbooks**
- **Centralize data for faster, more confident decision-making**
- **Scale your business easily across different units and regions**
- **Build a NetSuite ERP ecosystem that evolves and grows with your business**

**Rethink ERP.
Reimagine What's
Possible.**

Your ERP should do more than keep data. It should help you make decisions, fuel growth, and keep up with how fast your business moves. **Let's talk about creating a smarter NetSuite ERP foundation that works for your business.**
